ABOUT US

SMART TECHNOLOGY SOLUTIONS

Founded over 10 years ago in the heart of Marylebone, Central London, Communitec began as an IT and AV solutions provider within London.

Since then, Communitec has grown its customer base extensively serving the UK, Europe and USA.

With satellite offices in New York and Los Angeles we have been able to reach new markets further

afield, including Dallas, Boston and many others.

We pride ourselves on providing best in class technology solutions, that are implemented by our experienced and professional team. Our team members are trained and highly skilled, all with significant experience working in this innovative industry.

With our specialist team, you benefit from a simple and personalised management and engineering process.

With a dedicated approach to our work, Communitec guarantees to not only provide you with the best possible service during the project itself, but to provide on-going technical support and assistance with all of our installations.

OUR PROCESS

SMART TECHNOLOGY SOLUTIONS

STEP 1: **CONSULTATION**

At this stage, we discuss your project, offering our specialist advice and attention to detail.

Through this process we discuss and advise on the best approach and lay the groundwork for our comprehensive concept and design phase.

STEP 2: **CONCEPT & DESIGN**

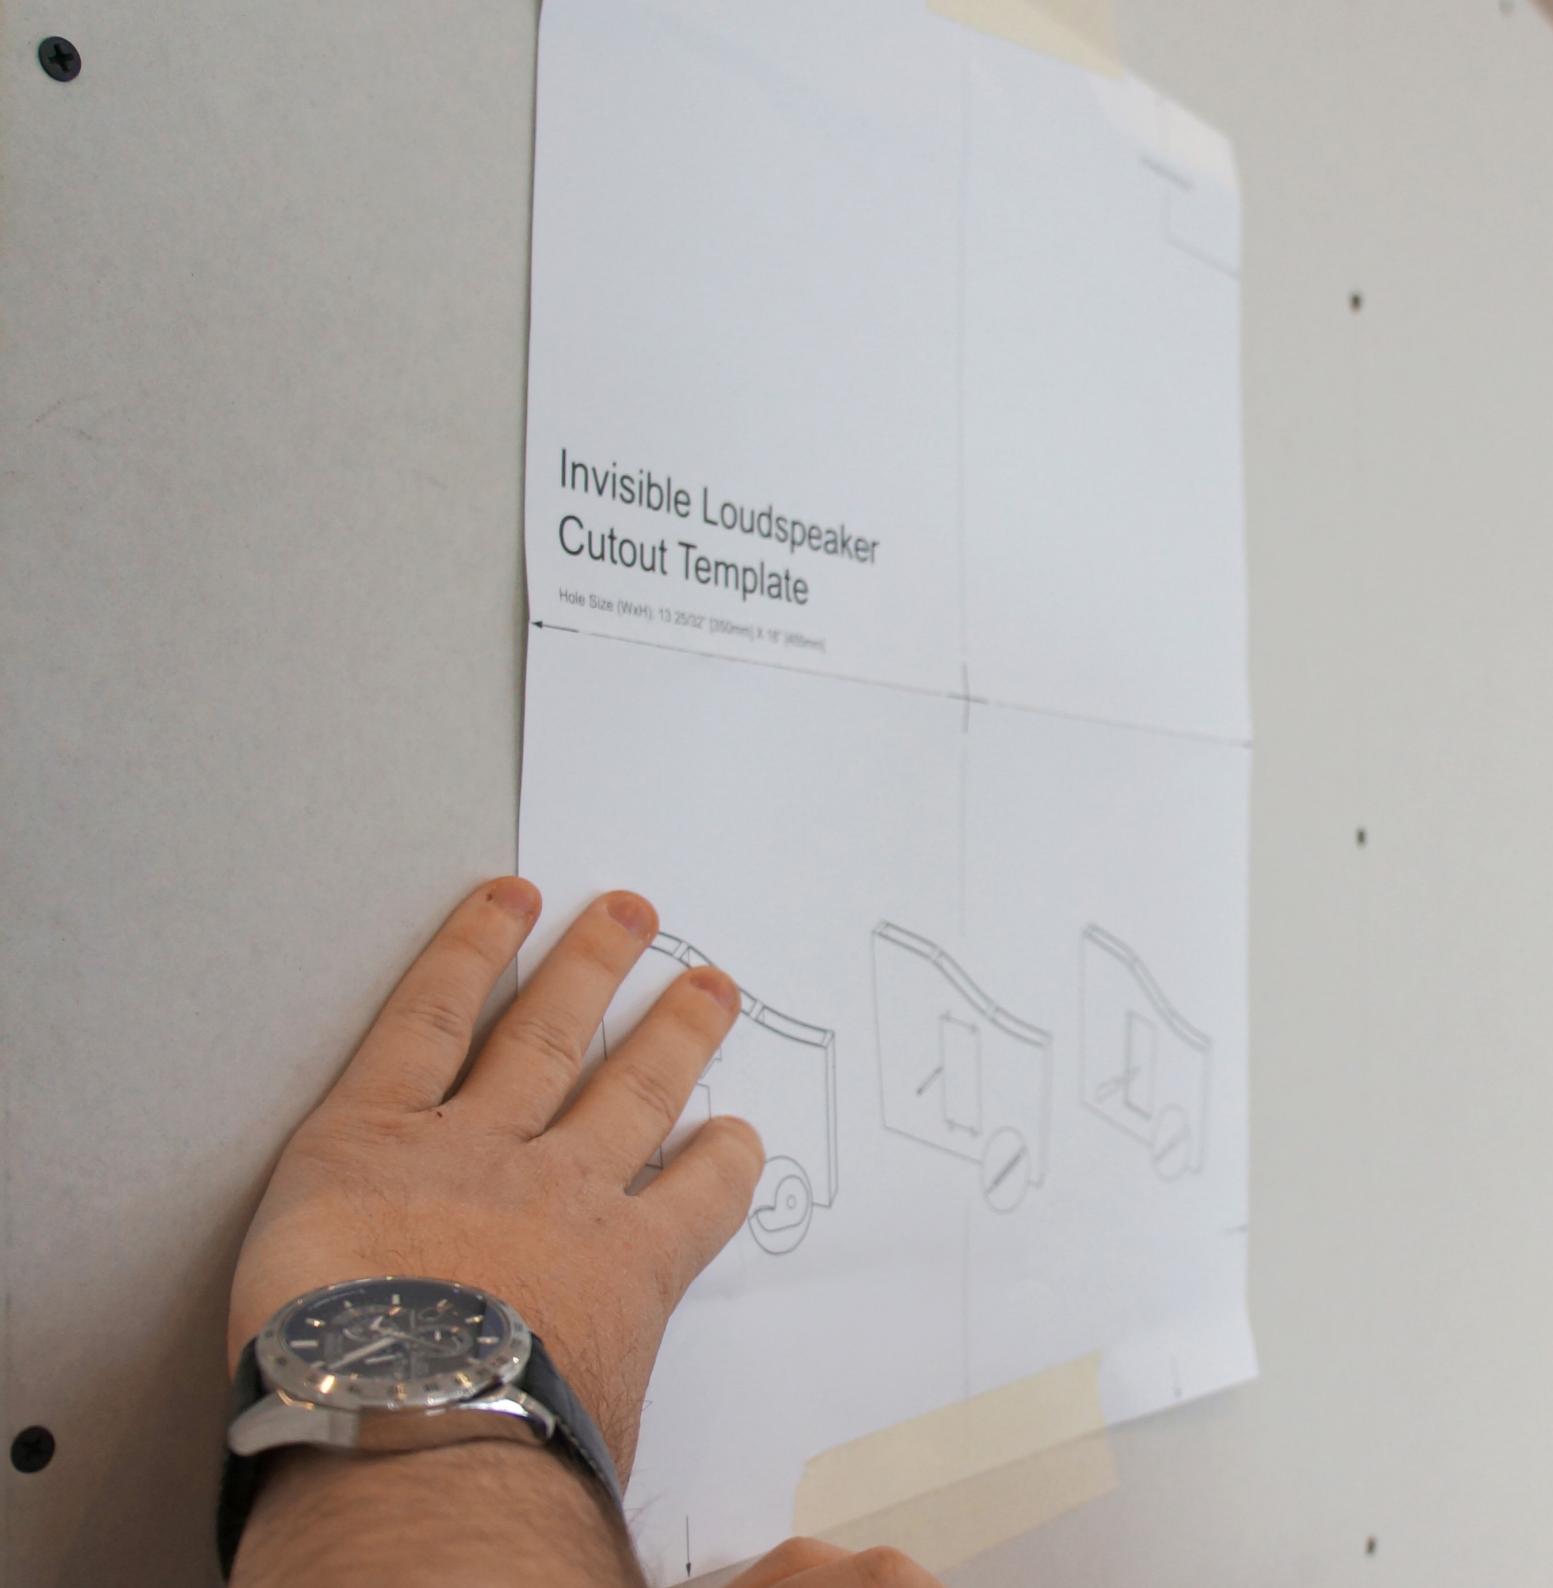

Design is paramount to the delivery process, so our technical designers will walk you through your room-by-room plan, detailing every inch of your vision.

Once a complete plan is drawn, the documents become the blueprint for your bespoke build.

STEP 3: **PROJECT MANAGEMENT**

Once designed, the project manager in charge of the build can start to assemble all the pieces of the puzzle to professionally and precisely begin the construction.

We work efficiently and with great attention to detail, guaranteeing the highest quality finish.

OUR PROCESS

YOUR TRUSTED TECHNOLOGY PARTNER

**STEP 4:
INSTALLATION &
PROGRAMMING**

Once our technicians begin integrating and programming your AV solution, our dedicated service means that installations are efficient as we work entirely around your schedule.

**STEP 5:
SYSTEM TRAINING**

Each and every system is designed to be user-friendly and tailored to the client's desires.

Our technicians will supply you with a handbook for all of our installs and will walk you through these intuitive interfaces.

**STEP 6:
SUPPORT & MAINTENANCE**

On the rare occasion that any issues occur with your system, we have trained and dedicated support staff to handle any issue you may experience or answer any questions you may have.

We also offer maintenance packages which extend beyond the manufacturer's warranty on any installed devices.

SMART CONTROL

MAKING EVERY DAY EASIER

Savant is a premium automation and control experience that will improve the way you interact with your home.

We are proud dealers and integrators of all Savant products and services.

Savant has several system control options that all allow wireless control throughout your home. Other brands and options are available.

COMPLETE CONTROL

View multiple rooms and system functions at the same time. Turn the lights off upstairs, whilst watching television downstairs - or view all of your security cameras on one screen, simultaneously.

MOBILE APP

Safely and securely control the house when nobody is home. Control the heating, or turn on the lights, all while being out of the house.

MEDIA & MORE

We ensure that all of our products are compatible with and complimentary of one another, resulting in a stable and simple automated home.

Controlling all of your AV systems has never been easier. Simply pick up your Savant remote control or use your phone or tablet device. The Savant app is available on all iOS and Android devices.

LIGHTING & SHADING

AMBIENCE AT A TOUCH

Creating the right atmosphere is paramount to any luxury space. We source, install and integrate exceptional lighting systems. Our systems run on a simple program which can be controlled by a manual switch, smart control or even a mobile phone app.

LIGHTING

Our systems offer complete control of the lighting of a home in every room, or across the entire house simultaneously.

You can adjust the intensity of the lighting to have a bright or dim setting in any room where our systems are installed.

SHADING

We install and integrate a variety of remote control blinds - from sheer blinds, to blackout blinds as well as motorised curtains.

These integrations enable you to have remote control from one handset or phone app.

FIVE AMP
Five AMP is an elegant electrical system, enabling traditional lighting to become a part of a smart home lighting integration.

It is therefore possible to make side lights, table lamps or floor standing lamps a part of any project, controlled via a handset or app.

AUDIO SYSTEMS

EXCELLENCE IN DIGITAL AUDIO TECHNOLOGY

AUDIO SYSTEMS

Communitec work with a variety of well-established audio systems, to create uncompromising, high-definition audio experiences for any space.

In order to provide an unparalleled level of finish and design, many of these speakers are uniquely designed to be built into the walls

and ceilings and powered by our selected audio amplifiers.

INVISIBLE SPEAKERS

We integrate exceptional invisible audio systems which are designed to be totally discreet, while maintaining the highest quality of audio.

Communitec ensure that the finish on all of our invisible speaker

installations prioritises design and sound, resulting in speakers that are heard but not seen.

VISIBLE SPEAKERS

We also offer a wide range of visible speakers. We have a solution for all of your install needs.

VIDEO SYSTEMS

WATCH EVERYTHING EVERYWHERE

VIDEO SYSTEMS

Communitec works with a variety of well-established video distribution systems, allowing you to view multiple sources in multiple locations throughout your property.

These systems can be neatly centralised in an AV rack or stored locally at your desired viewing location. Communitec work with the latest in HDR and UHD 4K technology providing the optimal viewing experience.

4K UHD

4K or Ultra-High Definition, more

commonly known as UHD is becoming an industry standard. 4K UHD provides crystal clear and sharp picture that is twice the definition of full HD.

As more and more sources move towards distribution of UHD content, we see it as our responsibility to ensure our clients are prepared for what lies ahead in the ever changing technology industry.

CENTRALISED

With a Centralised video system from Communitec you can chose

to play video or stream online media sources in whichever area of the home you desire.

Start watching your favorite television show in the lounge, pause, then continue watching in the bedroom, meaning you will never miss a second.

Another benefit of a centralised system is the clean installation of your television or projector system, resulting in no more wires or clutter at your viewing locations.

 **ATLONA**

HOME CINEMA

BESPOKE CINEMATIC EXPERIENCES

Our home cinemas combine the highest quality systems ensuring that an outstanding cinematic experience is achieved in the comfort of your own home.

HIGH DEFINITION PROJECTORS

We discreetly install the highest quality, leading brands of high definition and 4k projectors into an appropriate location within your cinema space, whether it is ceiling mounted, on show, or

hidden away in joinery or the ceiling.

CINEMA SCALE TV'S

In order to provide a unique cinematic experience, we install world-leading, high-definition and 4K cinema scale smart TVs, where a projector might not be suitable.

CINEMATIC SURROUND SOUND

We work with a number of speaker brands to provide our clients with

their desired speaker configuration.

From 5.1 to full Dolby Atmos we can supply, install and maintain a cinematic sound solution for your space.

LIGHTING & SHADING

Our intelligent lighting solutions provide a multitude of dimmer settings, and lighting combinations for the ideal cinematic ambience.

SECURITY

FOR YOUR PEACE OF MIND

CCTV

We install durable and secure CCTV solutions, which can be viewed remotely via phone or tablet, as well as in your home.

We offer a wide range of CCTV systems with features including night vision, 360 coverage and motion detection.

ALARMS

We install high quality, responsive alarms which cover anything from the front and back doors to full, floor-specific alarm systems.

Crucially, these systems are capable of being securely armed or disarmed remotely.

DOOR ENTRY

Our door systems provide video and audio, directly from a property's front door or gate, which can be accessed from a phone or tablet.

Alternatively, these door entry systems can be seen, heard and controlled through a mounted wall device, as well as through the internal phone line.

CLIMATE CONTROL

MAKING YOUR CLIMATE SMART

We integrate with all major heating and cooling manufacturers, allowing complete control of your home's climate.

HEATING

Smart thermostats learn the habits and comfort levels of their users. This means they learn when to heat a home on-the-fly - even to the extent of turning themselves

off when no one is at home.

These solutions improve comfort whilst helping the environment and your energy costs - all in an elegant and easy to use package.

COOLING

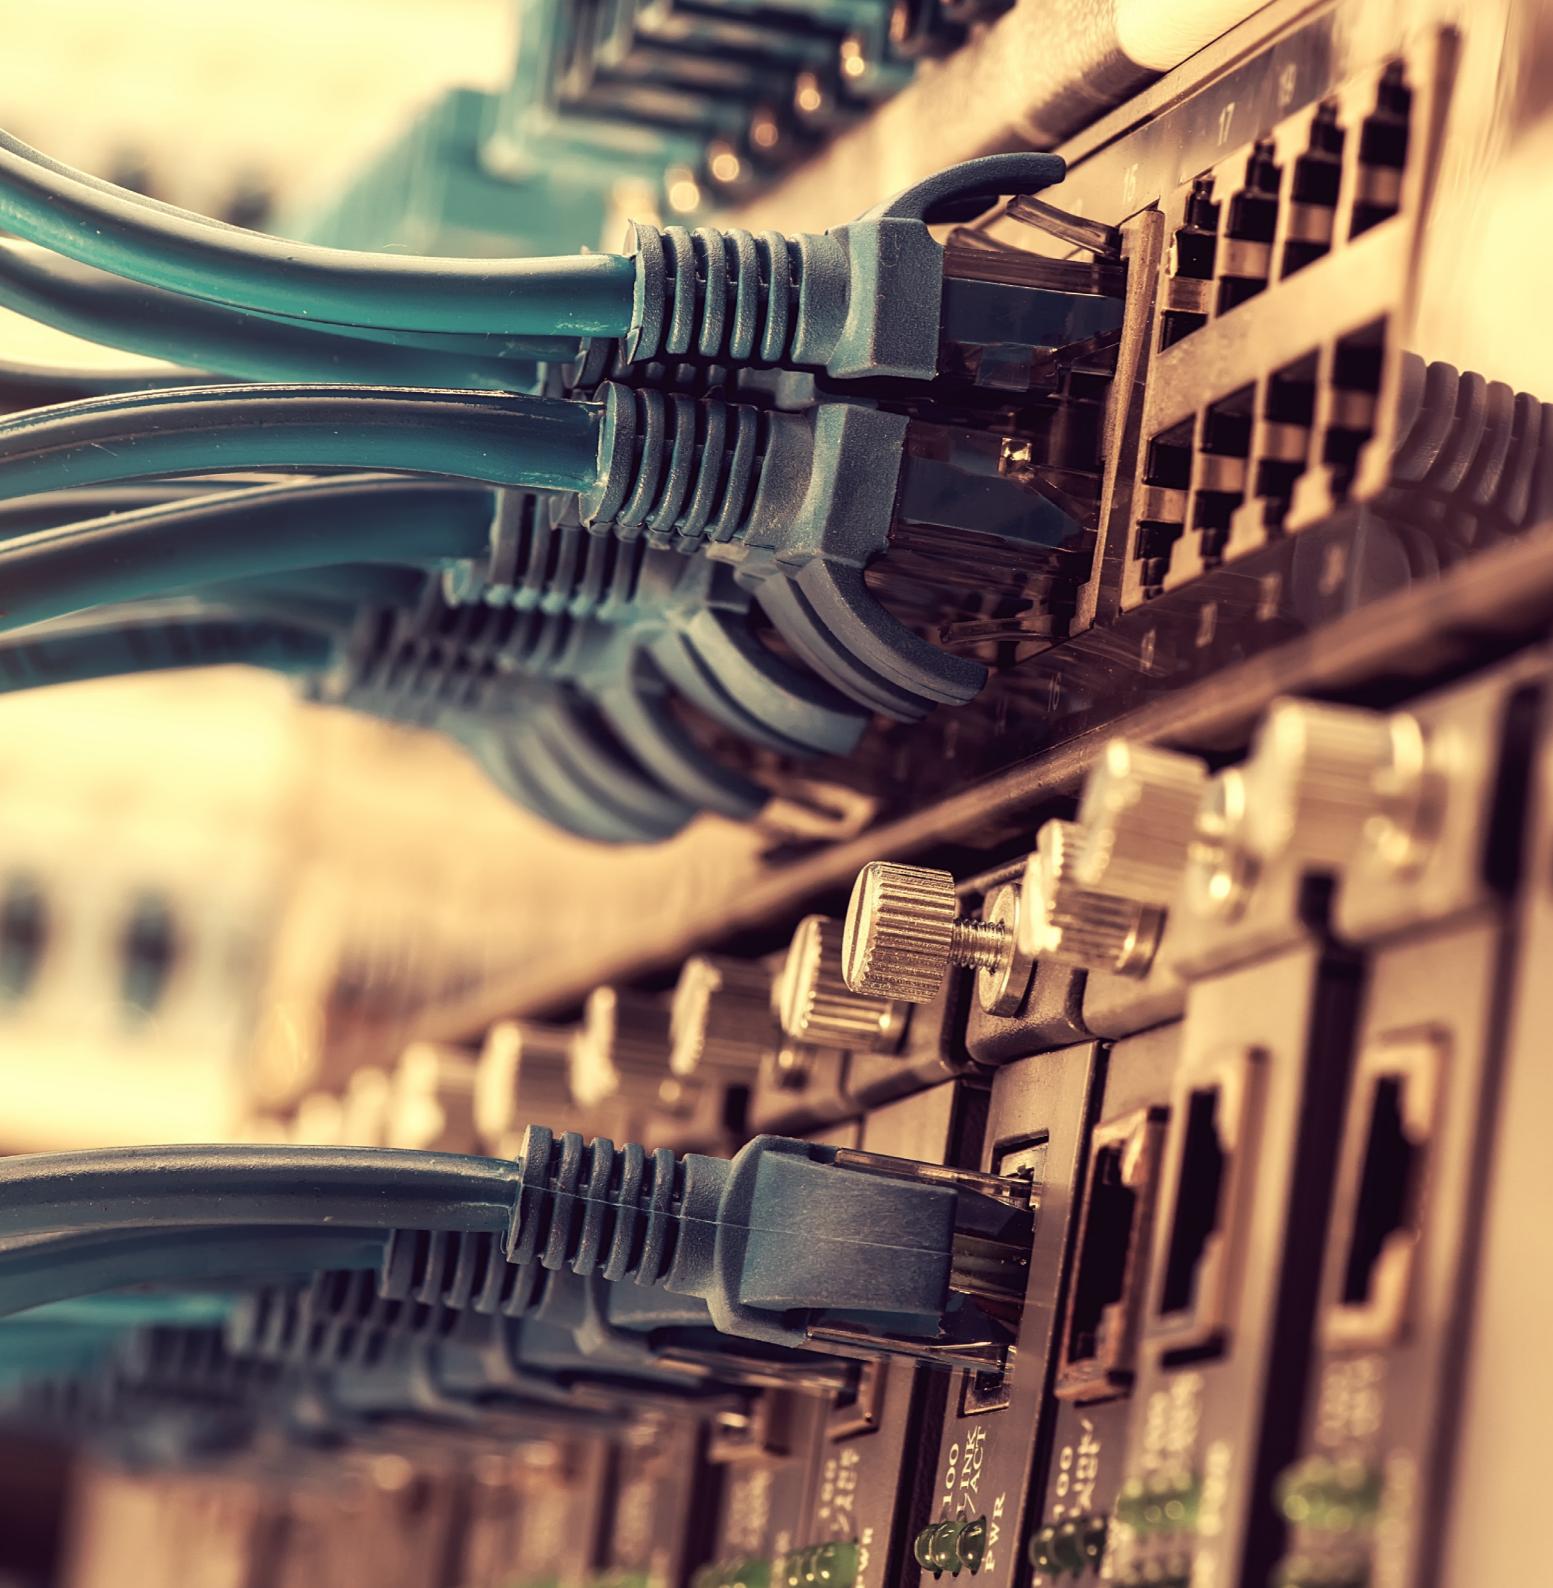

Furthermore, our HVAC systems also offer intelligent cooling, when running in automatic

mode. These systems will detect which rooms require cooling and will turn themselves on and adjust in response to external temperatures.

These systems can be controlled manually and wirelessly from phone apps; and integrate with our smart control systems.

NETWORKS & TELECOMS

EFFECTIVE IT SOLUTIONS

Our in-house team can design networking solutions specifically for your home or business, encompassing all the media and devices that you use.

In all our domestic projects we use the same technology and materials that we use in commercial projects, so you get the best possible solution.

TELECOMS

If you need a telecoms solution for your home, we can help. Our

team of experienced engineers will quickly and professionally setup your system with as little disruption to your household as possible.

All the systems we install are designed to be user-friendly, and they are optimised for the home environment.

Part of this quality service includes carefully wiring all the cables and storing them in cabinets. This reduces clutter, keeping the mass

of cables required for a networking solution clean and tidy.

IT SUPPORT

Staying true to our roots, we still offer a personal and professional IT support service.

We work with a variety of personal and business clients providing both on site and remote support. This is done in conjunction with all of our AV services.

LUXUL NETGEAR® DrayTek

LUXURY YACHTS

THE ULTIMATE EXPERIENCES

We source, install, integrate and maintain bespoke AV devices for yachts of all sizes.

We work with the cutting edge of AV technology, providing entertainment, security and living solutions that enhance the luxury and enjoyment of any yacht.

We handle the complete installation, from designing the cabling system, to supplying the materials - and we provide continued maintenance and support.

Our services for yachts include media, entertainment, lighting, cooling and heating systems.

All of our systems are installed to marine grade, in order to ensure that your fittings meet all relevant regulations.

COMMERCIAL

SMART SOLUTIONS, SMART BUSINESSES

The majority of the products we offer are also applicable in both commercial and retail environments.

Our background in IT and integrated technology solutions allows us to work with businesses to help them achieve their full potential.

We have worked with gyms, shops and offices to design solutions that meet our clients business needs.

Alongside all of our aforementioned products we also offer a broad spectrum of products for corporate applications.

Some of these brands include ClearOne, Barco and Canon.

Our solutions are designed to improve operations and help you do better business.
